The Journal of Systems and Software 44 (1999) 257–258

The Journal of Systems and Software

Contents Volume 44

Contents

Editor's Corner
Webwork: is it systems development? How can we learn about doing it better?
R.L. Glass 1

Improving the performance of distributed shared memory systems via parallel file input/output
C.-K. Shieh, S.-C. Mac and J.-C. Ueng 3

Classifying and alleviating the communication overheads in matrix computations on large-scale NUMA multiprocessors
Y.-M. Wang, H.-H. Wang and R.-C. Chang 17

Prototyping experiences with classical IP and ARP over signaled ATM connections
C.L. Schuba, E.H. Spafford and B. Kercheval 31

Applying complexity measures to rule-based prolog programs
T.T. Moores 45

High-performance Arabic character recognition
J. Alherbish and R. Ammar 53

A spatial match retrieval mechanism for symbolic pictures
C.-C. Chang and C.-F. Lee 73

Editor's Corner
Good numbers – And bad
R.L. Glass 85

A comparative evaluation of CASE tools
G. Post, A. Kagan and R.T. Keim 87

CASE and software maintenance practices in Singapore
D.C.C. Poo and M.K. Chung 97

Supporting software maintenance with software engineering tools:
A Computed task–technology fit analysis
M.T. Dishaw and D.M. Strong 107

A method for the identification of reusable units through the reengineering of legacy code
E. Burd and M. Munro 121

A comparison of measurement and defect characteristics of new and legacy software systems
J. Tian and J. Troster 135

Metrics for object-oriented software projects
J.S. Sherif and P. Sanderson 147

Another metric suite for object-oriented programming
W. Li 155

A study of the sensitivity of software release time
M. Xie and G.Y. Hong 163

Editor's Corner
Program comprehension
G. Canfora, A. Lakhotia 169

Cognitive design elements to support the construction of a mental model during software exploration
M.-A.D. Storey, F.D. Fracchia and H.A. Müller 171

Assessing the maintenance process through replicated, controlled experiments
G. Visaggio 187

Identifying objects in legacy systems using design metrics
A. Cimitile, A. De Lucia, G. Antonio Di Lucca and A. Rita Fasolino 199

Points-to analysis for program understanding
R. Fiutem, P. Tonella, G. Antoniol and E. Merlo 213

Evaluation of the ITOC information system design recovery tool: a case study
J. Harrison, W. Ming Lim, A. Andrusiewicz and A. Berglas 229

Using Belbin's leadership role to improve team effectiveness: An empirical investigation
S.M. Henry and K. Todd Stevens 241

Ethical considerations of the software-dependent organization
J. Pinn Carlisle 251

Contents Volume 44 257
